

Memorandum

Date: April 11, 1997

To: San Joaquin River Technical Team Participants

From: Cindy Darling *Cindy*

Subject: Revised Report

Enclosed is the revised report from the technical team meeting at Bass Lake earlier this year. I really appreciated all the comments provided on the earlier draft. I have not prepared individual comment response letters but am available to discuss any concerns you may have about how your comments were or were not reflected in the revised report. I tried to include as many comments as possible without straying from what was actually discussed at the technical team meeting.

This revised draft is being shared with the Ecosystem Roundtable so they can discuss some of the policy issues at today's meeting. I will also work with Paula Landis to provide copies to the appropriate policy level for the San Joaquin River Management Program.

This report, along with reports from the Sacramento River, North Bay, American River, Delta, Suisun and Eastside Tributaries, and Water Quality technical teams will be integrated by the umbrella team so that proposals can be solicited starting in mid-May. All participants in the technical teams will be provided with a copy of the package soliciting applications for funding. This package will include the criteria used to evaluate the applications, the format for the applications, and instructions on how and when to submit them. We anticipate that applications will be due 5 to 6 weeks after the package is mailed out. If you know of any other parties who may be interested in submitting an application, have them mail us a brief letter with their name and address indicating that they want a copy of the package and we will add them to the mailing list.

I appreciate all of your time and efforts. If you have any questions or comments, please call me at (916) 653-5950 or via e-mail at cdarling@water.ca.gov.
